“Artistic Specialty Mouldings” is operating as ASMouldings, a division of Artistic Stairs, a highly respected manufacturer and installer of stairs and railings since 1979.

Our work is on time every time, done right the first time.

We are the manufacturer. Buy Direct. Alberta made.

We produce in just about any wood type we can source, domestics and imports, hardwoods and softwoods.

We make our own knives for our tooling needs allowing us to stay on schedule to meet your needs.

Our company just installed our third moulder, has an optimizing rip saw, optimized CNC routers , resaw, hot and cold laminating presses, radio frequency press, clamp racks, bandsaws, wide belt sanders, profile sanders and profile shapers, production lathes, custom turning and sanding equipment, plus other millwork machinery. Truly quality equipment.

Any profiles you can imagine we can produce. Straights, curves, build ups. In addition panels, butcher block, table tops, treads. CNC routing, custom turnings, to name a few items.

This is but a small sampling of our possibilities.

3D Wall Panels

Top-quality innovative wall panels from moisture-resistant 3D milled MDF material, is the perfect decorative solution to arrange luxurious interiors. Thanks to modern technology and perfect design, we can now have walls, ceilings, buildings and furniture in an interesting, remarkable style. MDF 3D decorative panels eliminate similar solutions with plaster decors. MDF 3D wall panels are resistant to moisture, lightweight, easy to install, durable and less costly than proposals of decorative slabs and plaster or resin panels. What is very important, 3D MDF decorative panels can be connected together without visible seams. Our 3D decorative panels can be easily mounted not only on traditional walls and ceilings, but also on light GK walls (plaster-board) or OSB plates.

Ability to design and realization of any model!

Characteristic Mdf 3d Panels

- Thermal insulation.
- Sound insulation.
- Resistant to the wetting and the formation of water condensation.
- Abrasion resistance.
- Resistance to mechanical damage.
- Anti-static surface.
- Resistance to dust and dirt.

CNC Work

We have extensive CAD (Computer-Aided Design) and CNC (Computer-Numerical Control) capabilities for machining flat material of all types up to 5' x 12'. We specialize in solid wood and other wood composite materials such as MDF, plywood and laminates. plastics (Phenolic, HDPE, Acrylic, Delrin, etc) and similar sheet materials. Wood forms, Holes, grooves and pockets; lettering, engraving and signage; edge profiles and shapes – we do it all!

We can help you with prototyping a new product or handle production runs in almost any quantity. Think of us as your CNC machine shop for wood.
